Abstract

Provide a concise summary of the study including **research background, objective, methodology, key findings, and implications**. The abstract should be **200–250 words**.

Keywords

Provide **4–6 keywords** related to the research topic.

Example: Artificial Intelligence, Machine Learning, Data Analytics, Smart Systems

1. Introduction

Introduce the research topic, background, research problem, and objectives of the study. Explain the importance of the research and its relevance to the conference theme.

2. Literature Review

Discuss relevant **previous studies, theories, and research gaps**. Clearly highlight how the current study contributes to existing literature.

3. Research Methodology

Describe:

- Research design
- Data collection methods
- Analytical tools or models
- AI techniques or algorithms used (if applicable)

4. Results and Discussion

Present the findings of the research using **tables, graphs, or figures where appropriate**. Interpret the results and explain their significance.

5. Conclusion

Summarize key findings, research contributions, and practical implications. Suggest future research directions.
